# 424	Name: <b>Bolgen Creek</b>		Cause: Lightning	Admin: Danzhit

Narrative: With sustained high temperatures and low RH's, fire activity in the Complex varied from moderate to high. The Bolgen fire experienced a significant increase in fire activity, and currently has a six mile front along the west flank, north to Crooked Creek. The persistent smoke inversion moderated slightly this afternoon, allowing limited air tactical operations. Mop up continued around structures north of Quartz Creek, and north of Central. Structure protection measures were established and maintained throughout the Central and Circle Hot Springs developed area, and at numerous isolated residences, north and south of the Steese Highway. Line resources continued to reinforce containment and contingency lines to protect structures and other improvements. A local Jiggernaut, and Nodwell were used to transport crews to critical locations in Division Echo. Burnout operations were completed in Echo this morning by the Payson and Flagstaff IHC's. Burnout operations were ongoing in Foxtrot with the Boise and Sawtooth IHC's. Alaska's Minto, Pilot Station, Kiana and Koyuk crews were holding critical line concurrent with the burnout operations in Division Echo and Foxtrot. Helicopter bucket support was utilized on spot fires within Division Echo and Division Foxtrot to keep the fire north of Crooked Creek. Snag abatement measures along the Steese Highway from Central to Quartz Creek continued. Operational and Population Protection Planning for a red flag wind event 8/19 has been completed. Line resources continued to work on key areas in preparation for this wind event. Coordination with FEMA on cost apportionment for the Bolgen fire continued. Rehabilitation reconnaissance and planning continued. Total personnel on the Central Complex (where Bolgen Creek was once again the main concern): 627

Narrative: Good progress was accomplished with the installation on a second port-a-tank and helicopter support. The slopover is approximately 50% contained. Wind prediction for 8/19 causes concern with possibility of stirring up hot spots along the fire perimeter especially with down timber. Fire behavior consisted of creeping, smoldering with occasional flare ups of down fuels.

Narrative: Structures and allotments continue to be threatened in Mansfield, Dot Lake, and Sand Creek areas. The fire received a steady west wind today which caused the east and southern perimeter of the fire to be active. The eastern edge of the fire advanced towards the Porcupine fire. Structure protection is in place at the cabin near H-80 on the north side of Lake Mansfield. Conditions permitting, personnel will construct a helispot and assess needs for structure and allotment protection in the Sand Creek Drainage. Total Personnel: 23
